

OVERVIEW:

National Productivity Organization, Ministry of Industries & Production a liaison office of Asian Productivity Organization (APO) Tokyo, Japan announces one-day training program on "Quality of Food Safety Measures" at Islamabad.

Food safety is a scientific discipline describing handling, preparation, and storage of food in ways that prevent foodborne illness. The occurrence of two or more cases of a similar illnesses resulting from the ingestion of a common food is known as a food-borne disease outbreak.[1] This includes a number of routines that should be followed to avoid potential health hazards. In this way food safety often overlaps with food defense to prevent harm to consumers. These kind of training programs are required because of the following:

- Effective capacity building benefits both the company and local stakeholders by generating inclusive processes that strengthen trust and build commitment and good relationships.
