

## National Productivity Organization

Announces One Day (21st February 2018) Program on

### **Total Productive Maintenance**

National Productivity Organization, Ministry of Industries is pleased to announce a one day training program on “Total Productive Maintenance” . TPM is a management system for optimizing the productivity of manufacturing equipment through systematic equipment maintenance involving employees at all levels. In TPM, everyone is involved in keeping the equipment in good working order to minimize production losses from equipment repairs, set-ups, and the like. This program is designed so that trainees can apply maintenance strategies, philosophies, procedures and techniques to their own work positions, and complete assignments, projects and other tasks by focusing on actual circumstances that exist within their individual workplaces.
